

Accidents and Injury

Did you Know?

About 12,000 children die each year from accidental injuries

Children older than 15 are 5 times likely to die of poisoning than younger children

9.2 million children go to the ER for an accidental injury each year

Common cause of injuries at school include bullying, slipping and falling, playground accidents, food poisoning, school bus accidents, and sports injuries.

Check Your First Aid Kit For:

Working flashlights and/or two-way radios with good batteries.

Check the expiration dates and packaging on any antibiotics or ointments in the kit.

Replace any supplies in your kit that looks like it has been used up
