

# The Cardiac Science™ AED Program Management

We make it easy to administer an AED program

## Primary Users

- Large corporations
- Small, medium-size business
- Government agencies
- Military and law enforcement
- Community organizations
- Schools and colleges

## Primary Benefits

*Peace of mind.* Your AED program will help you meet government requirements and your AEDs will be ready to use when an emergency happens.

*Complete solution.* One program, run by one vendor, handles everything from physician oversight and staff education to maintenance and service issues. We make the equipment, we educate, we record keep, and we provide medical direction. We outsource nothing.

*Effective management.* Save administrative time with 24/7 access to customer care, maintenance and service records, training and scheduling, device status, and program reports.

## Expert program management makes AED ownership easy

You've made the commitment to buying an AED, providing life-saving protection for your organization and community. Now there are legal and administrative details to handle.

With Cardiac Science AED Program Management, experienced people are there to guide you, every step of the way. We can help you make sure your program meets all the requirements. Our comprehensive program is designed to ensure you – and your AEDs – will be ready when an emergency occurs.

## A complete solution

- + Help satisfy government requirements. Many states and jurisdictions require medical direction and oversight for AED programs. With Program Management, Cardiac Science takes care of that for you.
- + Provide education for staff and volunteers. Cardiac Science employee educators deliver certified AED/CPR courses from the American Heart Association and Emergency Care and Safety Institute (ECSI).
- + Ensure compliance over time. Our MasterTrak™ system helps you keep track of education schedules, staff records, equipment maintenance, and more.

## It pays to partner with a leader

We've been doing this a long time – longer, in fact, than anyone in the industry. To date, we've implemented more than 20,000 AED programs and our 150 educators have taught more than 350,000 students. We have customers for our products and services all over the world.

We currently manage AED programs worldwide for institutions as large as Starwood Hotels & Resorts Worldwide, Inc. and Merrill Lynch & Co. and as small as your local dentist's office.

Best of all, in AED programs managed by Cardiac Science, a greater than 50 percent survival rate has been documented – versus an average five percent survival rate in the U.S.

### Choose the plan that's right for you

Because AEDs are life-saving devices, federal and various state regulations require a licensed physician to oversee your program, meticulous record keeping, and AED/CPR instruction. For these tasks, our AED Program Management service is a sound investment.

You'll appreciate having one point of contact to oversee all components of your program. And, with one provider, you'll be assured a consistent result – our very best – whether you have one location or many all over the world.
